Linis™ Pure Water Systems Introduces Water Station™

Compact and Great for Your Budget: High Quality Linis™ Water Station™ point-of-use water purification systems deliver pure, delicious, hot and cold drinking water right where you need it. These bottleless, plumbed-in systems are available as self-contained purification units with installed reverse osmosis or micro filtration systems, or without filtration for quick connection to a Linis™ Water Hub™ central RO unit. Water Stations™ replace expensive, unsanitary and cumbersome bottled water coolers and fountains with a clean, convenient, environmentally friendly and economical solution.

Features:

- Solid, Compact Space-Saving Design
- Stainless Steel Cold Tank
- High Capacity Hot Tank
- Large Dispense Area
- Fast Dispense Rate
- Coffee Maker/Ice Machine Port
- Colors: White, Black, Grey

Filter Options:

- 4-stage 100 GPD Reverse Osmosis
- 3-stage 1-micron micro filtration
- Without filters for use with a Water Hub™

Success Without Strings: Linis™ provides dealers with comprehensive sales and marketing tools including brochures, campaigns, and videos without binding contracts that limit dealers' options.

Linis™ Pure Water Systems is a brand of the Chester Paul Company, providing top quality service for more than 60 years.
